NOTABLE ALUMNI

Two decades of career growth helped Vanessa Fors build a name in design and product management. Her experience spans several markets from children's wear to women's sportswear, to the sports industry. In an authentic display of commitment to her chosen field, in 2016 she founded the first "un-conference" for the apparel and soft goods industry in Vancouver called ApparelCamp.

When looking for the perfect business graduate studies program, the flexibility of the Diploma in Business Administration (GDBA) and the part-time nature of the SFU Beedie Master of Business Administration (MBA) program caught Vanessa's attention. It gave her the ability to solidify the learning process—a means to explore new skills in the evening that she could then put into practice at work the next day.

VANESSA FORS

CATEGORY MANAGER AT MUSTANG SURVIVAL

"I always saw myself working beyond clinical pharmacy. I felt that I could also shine on the business side of healthcare. I knew that with my strong clinical training, an MBA would help open doors and give me the mobility I was looking for in my career."

"The part-time MBA program solidified what I wanted to do with my career. I saw the value of my healthcare background but also wanted to diversify. My MBA broadened my opportunities and gave me the extra experience and education required to bridge the gap between industries."

ROBERT TANG

PT MBA ALUMNUS

SENIOR MANAGER, CLINICAL INFORMATICS,
PROVINCIAL HEALTH SERVICES AUTHORITY

A dedicated healthcare professional, Robert Tang spent 15 years taking care of others, before embarking on an MBA journey he calls "transformational." Looking to diversify, it was opportunities for knowledge sharing and applied learning that drew Robert to the SFU Beedie School of Business Part Time Master of Business Administration (MBA) program. By combining an MBA with his extensive experience in clinical psychiatric nursing, project management, quality improvement, strategic planning, and accreditation, Robert possesses both the tactical tools and theoretical frameworks needed to drive change at the industry level.

During the program, Robert teamed up with members of his cohort to form a consulting group. It was a possibility that emerged from the program work they did with Ryders Eyewear in North Vancouver and with the Hong Kong Bank. It has been a launching pad for him in the work he has undertaken as a change leader in his industry, and is something Robert is still involved with today.

EXPAND YOUR PERSONAL AND PROFESSIONAL NETWORK

A TRANSFORMATIVE EXPERIENCE

The cohort in our Part-Time MBA program is small, allowing you to develop meaningful, long-lasting relationships with your peers. In fact, thanks to all the teamwork and co-curricular engagement opportunities, many find their fellow candidates remain friends and associates long after graduation.

COHORT LEARNING

Your cohort will be made up of working professionals who have, on average, over a decade of experience. Vastly different from any schooling you've pursued in the past, our PT MBA utilizes an applied, interactive approach. Our faculty are skilled at acting like facilitators to leverage the wealth of experience in the room.

INTERACTIVE LEARNING ENVIRONMENT

No two classes are alike. Each is filled with interactive lectures, cases, presentations and more. Throughout the program you'll

work in your assigned team, collaborating on projects and sharing your business and life experience.

EXPERIENTIAL LEARNING

We bring leading business knowledge to life through cases, projects and class discussions designed to mirror the challenging situations you encounter throughout your career as a decision-maker. In cases, for instance, you'll consider real-world business scenarios. Because the program is parttime and designed for working professionals, you'll be able to bring your work to school and vice versa.

SUPPORTIVE ENVIRONMENT

This is a safe place to make – and learn from – mistakes. You'll bring your skills and expertise to complement that of your cohort and together, develop creative solutions to complex problems.
